# Firmware Upgrade method

## 1. You can connect the camera to your computer
## 2. Opening "Samsung i-Launcher"
→ select "Firmware Upgrade" menu
* Automatically "Upgrade window" open
if new firmware registered.

## 3. You can check precautions

## 4. Firmware download start

**5. Once the transfer is complete,**
   **click the Close button**

Firmware upgrade for a camera/camcorder ✕

📋 > 📋 > 🖥 > 🖥✓

**Downloading the latest firmware has been finished.**
After disconnecting the camera/camcorder from the PC, power on the device. For a compact camera or a camcorder, firmware upgrade resumes when the shutter button is pressed.

For an NX camera, "Body Firmware","Lens Firmware" should be selected in the firmware update menu of the device to start firmware upgrade.

For some camera models, rotate the zoom button to the left and hold it, and then press the Playback button to display the firmware update prompt. (WB35F, WB50F, WB1100F, WB2200F)

When firmware upgrade is over, the camera/camcorder shuts itself off.  When powered on again, new firmware will be applied. If the battery level is low, firmware upgrade does not start. (Please do not remove the battery during firmware upgrade.)
✔ Close

**6. Terminate the USB cable connection**

**7. Turn the camera on**
 ※ **If you don't use i-Launcher but download**
   **Firmware from Samsung.com homepage directly**
    **➔ unzip "zip" file & copy firmware file(lens.bin)**
       **to SD card**

**8. Select the MENU → Setting**
   **→ Device Information**

MENU Back
